stained glass **APPLE** WINDOW CRAFT

MATERIALS NEEDED

- 2 sheets of clear contact paper per child (approximately 13×9" each)
- 1 construction paper apple frame per child (I used red)
- 1 green construction paper leaf per child
- 1 black construction paper stem per child
- red, yellow and green tissue paper cut into approximately 1/2" squares
- scissors (students)

INSTRUCTIONS FOR PREPARATION

- Cut all of the necessary paper materials ahead of time. While students are away from their desks, place a sheet of clear contact paper sticky side up on each child's desk.
- Place one red apple frame, one leaf and one stem onto each piece of contact paper.
- Place a basket of pre-cut tissue paper squares within reach of each student.

INSTRUCTIONS FOR ASSEMBLY

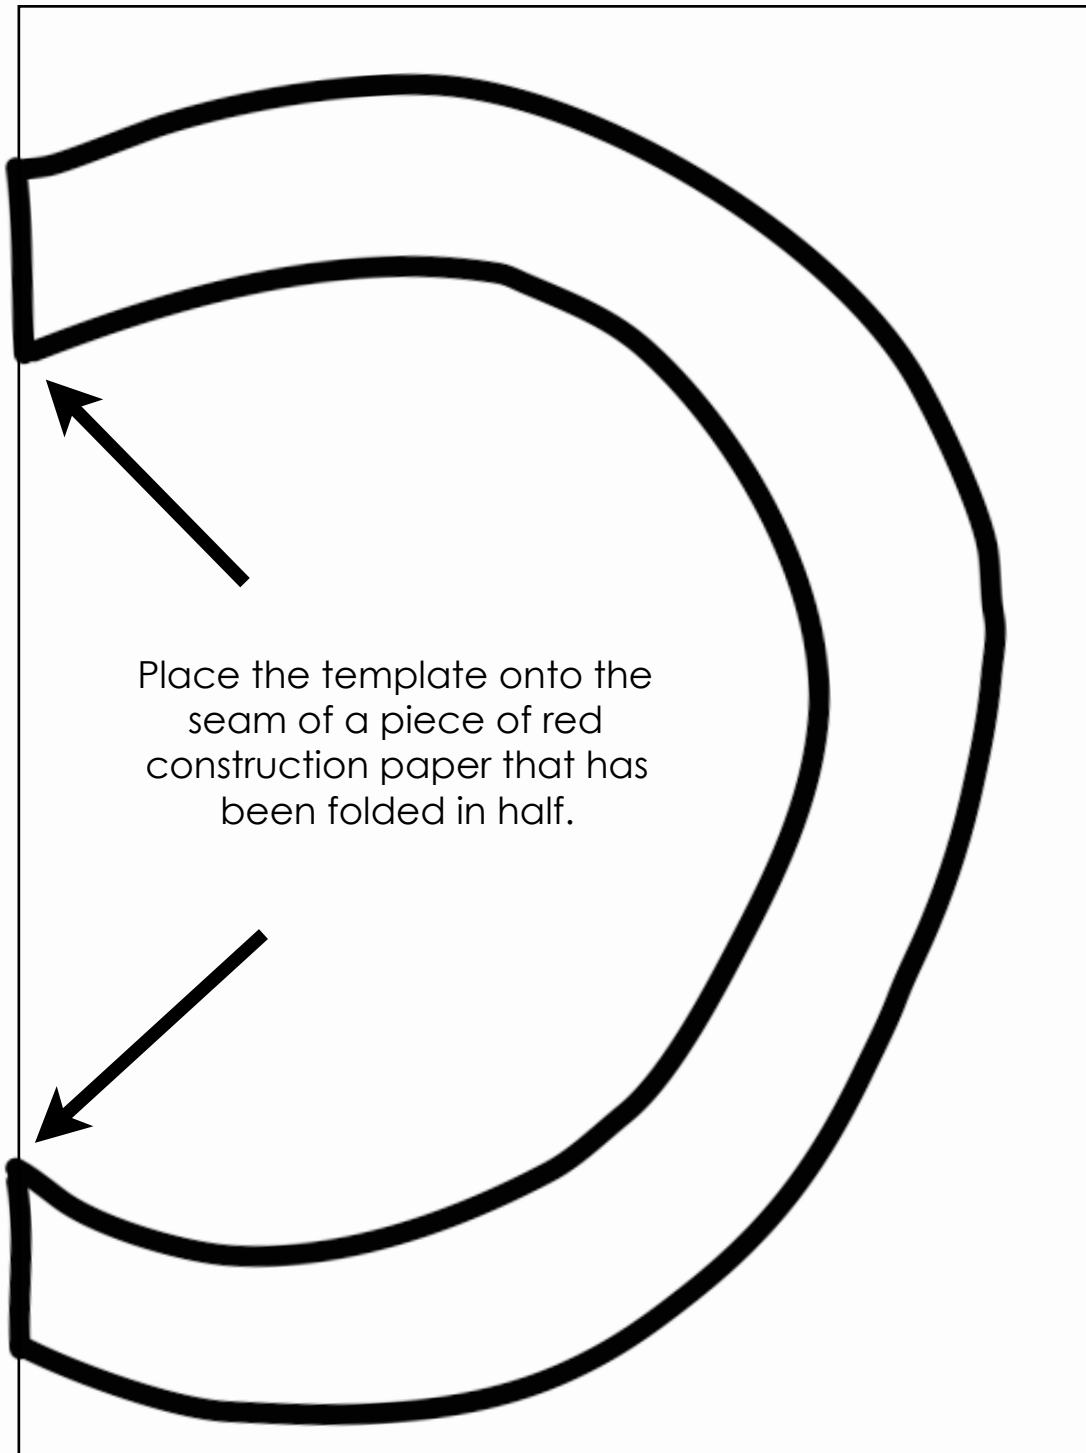

- Students fill the center of the apple with tissue paper squares.
- Once the center of the apple has been filled, place a second piece of construction paper (sticky side down) onto the apple. This will seal all of the tissue paper squares into place.
- Have students trim to remove excess plastic from around the edges of the apple.

I hang the completed apples in my classroom windows with a piece of clear scotch tape. It brightens the classroom and adds a personal touch from the students!

A complete visual tutorial for creating apple window decorations with this template can be found on the [Kinder-Craze blog](#).

APPLE FRAME TEMPLATE

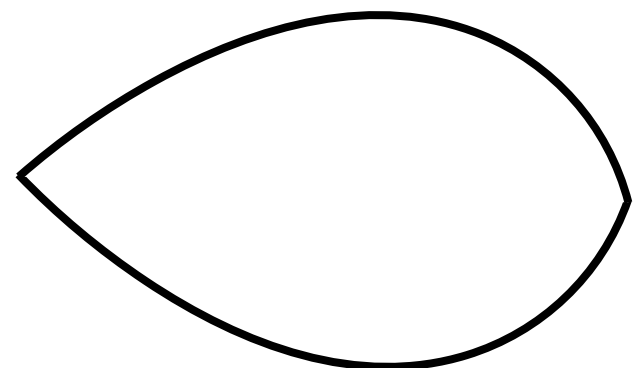

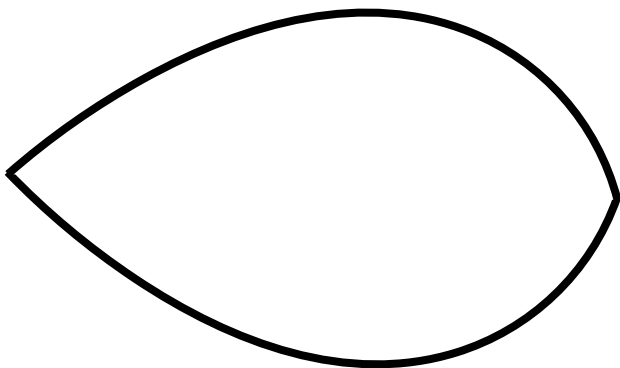

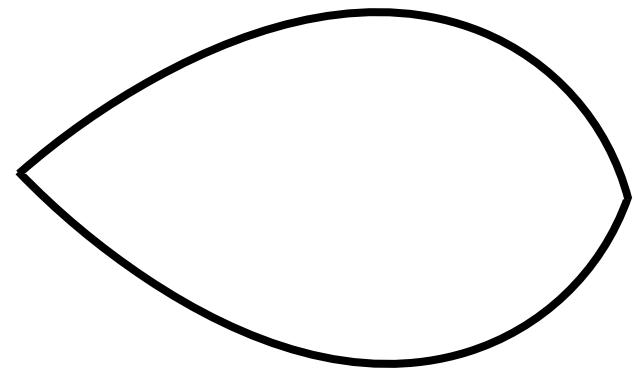

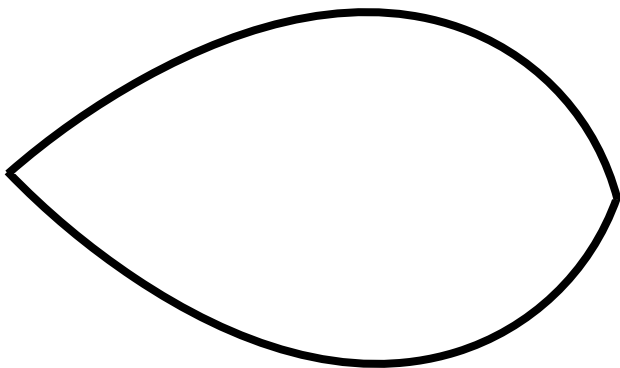

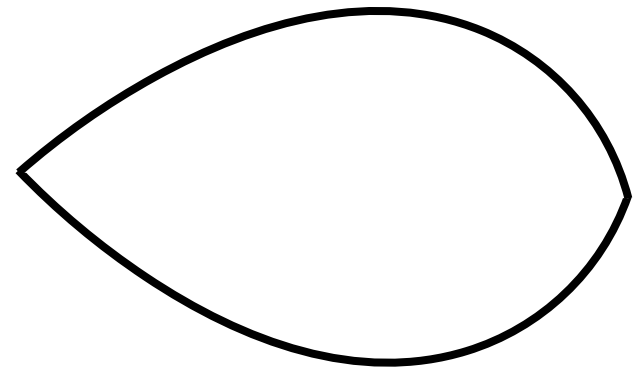

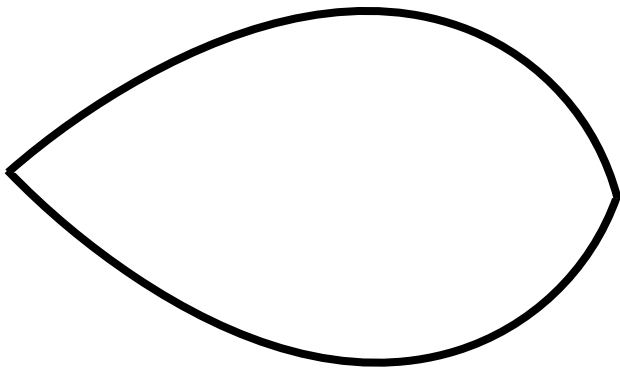

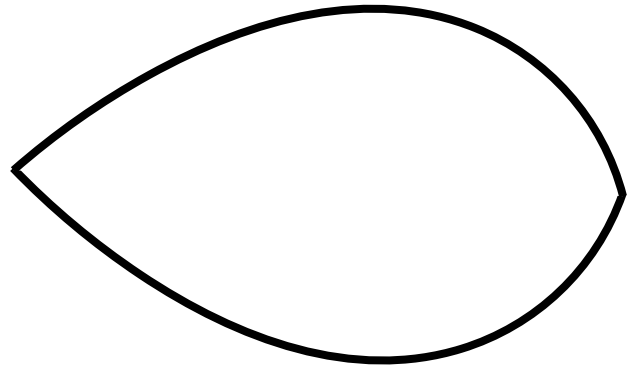

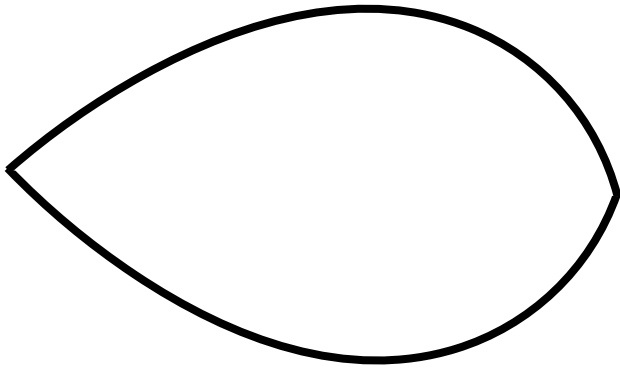

Print this template on heavy cardstock, and cut on solid black line. Fold a 9x12" sheet of red construction paper or cardstock in half "taco style" and place the straight lines of the template along the seam.

APPLE LEAF PATTERN

Print this page and copy onto green construction paper or cardstock. Place one green leaf at the top of each apple beside the stem.

APPLE STEM PATTERN

Print this page and copy onto brown construction paper or cardstock. Place one stem at the top of each apple.
